Hosted by Université Côte d’Azur, the 3IA Côte d’Azur brings together the site’s main players in artificial intelligence, CNRS, Inria, Inserm, Eurecom, Mines ParisTech and Skema Business School around four scientific axes: Core Elements of AI (statistics, statistical learning and deep learning); AI for Integrative Computational Medicine; AI for Computational Biology and Bio-inspired AI; and finally AI for Smart and Secure Territories. The four missions of the institute are research, education, innovation and outreach activities.

The 3IA Côte d’Azur is launching its first call for invited researchers. This call is open to researchers who have a foreign position. The duration of their stay at the 3IA Côte d’Azur will be between one and three months (see starting dates in the calendar bellow). The budget envelope opened for this call will make it possible to allocate approximately 12 months of hosting to be spread over several guests.

The application, to be sent to 3ia@univ-cotedazur.fr before the deadline indicated in the calendar in appendix, will include:

- corresponding 3IA chairholder, laboratory or research group of the 3IA and dates of the visit,
- curriculum vitae (max. 5 pages using 10 pt fonts and standard A4 margins),
- research project (max. 1 pages using 10 pt font and standard A4 margins), indicating contribution to 3IA Côte d’Azur research axis and collaborations with companies,
- supporting letter of the 3IA chairholder or of the head of the hosting laboratory or research group in the perimeter of the 3IA Côte d’Azur.

Priority will be given to applications to axis 3 "Computational Biology and Bio-Inspired AI" and axis 4 "AI for intelligent and secure territories". Particular (but not exclusive) attention will be paid to the fact that the invitation contributes to the international policy of the 3IA Côte d’Azur, in particular in order to strengthen existing relations with the University's privileged partners (Laval, Irvine, Utah), to develop relations with Italy (especially Genoa or Pisa), Canada, Germany or Japan.

Calendar of the invited researcher call 2020

- dissemination February 17th, 2020
- deadline March 27th, 2020
- arbitration June 1st, 2020
- starting between October 1st, 2020 and August 31st, 2021
