### EDUCATION

PhD - Life Sciences, Université de Nice-Sophia Antipolis-1995

MSc - Université de Nice-Sophia Antipolis-1991

### POSITIONS

2018-present: deputy director, *Institut de Pharmacologie Moléculaire et Cellulaire (IPMC)*

2012-present: director, *Laboratoire d'Excellence - Ion Channel Science and Therapeutics (LabEx ICST)*

2020-present: chargé de mission INSB, for interdisciplinarity, Atip/Avenir program, Conférences J. Monod

2021-present: senior director of research (DRE, Inserm)

2008-2021: senior director of research (DR1, Inserm)

2006-present: head of the team *Molecular physiology and physiopathology of ion channels, IPMC*

2003-2013: contrat d'interface/CHRT, *University Hospital of Nice, Department of Neurology*

2002-2008: director of research (DR2, Inserm)

2000-2002: visiting associate professor, *HHMI and The Rockefeller University, NY, USA*

1996-2002: researcher (CR Inserm)

### MAIN ACHIEVEMENTS

My research activity is focused on ion channels and cellular excitability. The main contributions have been the identification of a family of G-protein-coupled potassium channels in the brain and the isolation and characterization of a novel class of channels with unique structural and functional properties:  $K_{2P}$  channels. They produce background conductances that are a major determinant of the resting potential and input resistance, two key components of cellular excitability.  $K_{2P}$  channels are polymodal channels that integrate many stimuli, including pH, temperature, stretch, hypoxia, bioactive lipids and modulation by neurotransmitters and hormones. By designing a proteomic approach, we deciphered the composition of native  $K_{2P}$  channels in the brain. By making and studying knockout mice, we have shown the roles of these channels in heart and adrenal gland development, aldosterone secretion, nociception, and migraine. Recently, we provided the first evidence that  $K_{2P}$  channels can change their ion selectivity in physiological conditions, shifting from a hyperpolarizing/inhibitory role to a depolarizing/excitatory one. During a sabbatical at Rockefeller University, by "dissecting" presynaptic ion channels and associated proteins in sensory hair cells, I also identified new molecular links between ion channels and the neurotransmitter secretory apparatus, and between synaptic ion channel activity and nuclear transcription (providing one of the earliest examples of excitation/transcription coupling).

### SCIENTIFIC PRODUCTIVITY

- >130 publications cited more than 19,800 times, h-index: 69 according to Google Scholar (> 13,000 citations, h-index: 58 for Web of Science). Original articles in *Cell*, *Cell Reports* (2X), *Nature* (2X), *Nature Comm.* (3X), *Nature Neurosci.*, *Neuron* (4X), *EMBO J.* (14X), *PNAS* (11X), *J. Biol. Chem.* (16X), *J. Neurosci.* (4X)...
- 17 groups of international patents (licenses to *Idagen* and *Bristol Myers Squibb*), 32 sequences in *GenBank*
- >70 invited conferences, seminar and public lectures in France and abroad
- Member or chair of the scientific/organizing committees of 15 international meetings, workshops and schools

### AWARDS

2000: medal Maurice Nicloux, *Société française de biochimie et biologie moléculaire*

2000: fellowship, *North Atlantic Treaty Organization*  
2002: special prize, *Fondation pour la recherche médicale*  
2008: laureate of the French *National Academy of Medicine* (Prize Achard/Medicine)  
2009: invitation fellowship, *Japan Society for the Promotion of Science*  
2015: Chevalier - French National order of merit

## EDITORIAL BOARDS

**2010-present:** associate editor, *Frontiers in Pharmacology*  
**2015-2021:** review editor, *Journal of Physiology & Eur. J. of Physiology/Pflügers Archiv*  
**2018-present:** review editor, *Physiological Reviews*  
**2018-present:** associate editor for *Frontiers in Molecular Neuroscience*

## SCIENTIFIC COMMITTEES

Since 2000: nomenclature committee (K<sup>+</sup> channel genes), *Human Genome Organisation*  
Since 2002: nomenclature committee (K<sub>2P</sub> channels), *International Union of Basic and Clinical Pharmacology*  
Since 2019: committee “molecular & cellular physiology”, *International Union of Physiological Sciences*
