

Master « INNOVATION, ENTREPRISE ET SOCIÉTÉ » SPECIALITY
**RESEARCH IN MANAGEMENT
& INNOVATION**

Master « INNOVATION, ENTREPRISE ET SOCIÉTÉ » SPECIALITY RESEARCH IN MANAGEMENT & INNOVATION

ACQUIRED SKILLS

Analytical skills;
Quantitative and qualitative data collection and analysis;
Ability to conduct a literature review;
Ability to identify and formulate research questions;
Ability to design a research proposal;
Scientific writing and presentation skills (in English).

Testimonials

« I really appreciate the program with excellent supervisors and amazing classmates. The courses provide all the facilities to carry out high end research. Seminars help develop the skills needed to be a world-class researcher. You have all the tools to carry out your thesis! » Sarah

« A well-structured program as a foundation for entering a doctorate school » Parham

« Thorough training in cuttingedge research, two steps from the French Riviera » Nour

« This excellent program is designed for students who want to acquire the research skills required for embarking on a PhD in management science » Ehsan

PRESENTATION

The M2 Research in Management & Innovation (RMI) offers a solid foundation for students who wish to pursue doctoral studies and a career in teaching and research. It aims to provide students with a theoretical grounding and thorough research skills in a large spectrum of cutting-edge topics in management.

The program places a strong focus on innovation in both the organizational and ecosystem context. In the second semester students design an individual, supervised research project, which they present at the end of the year to the RMI faculty.

Regular seminars with top international scholars enrich the coursework component and expose the students to the highest academic publishing standards.

The diversity of interests and methods used by the RMI faculty and doctoral students, all part of the GREDEG research laboratory, creates a supportive research environment.

CONTENT

All courses are taught in English. The program is organized as follows:

Semester 1:

- Statistics
- Research Design
- Qualitative Methods
- Quantitative Methods
- Organization Theory
- Strategy
- Knowledge base and Innovation
- Innovation management and learning

Semester 2:

- PPR 4 - Research Proposal (PRP):
Final research proposal
Writing a research proposal
Participating in research seminars

Courses include a combination of seminars, independent research, presentations and class discussions based on articles published in top scientific journals.

ADMISSION CRITERIA AND PREREQUISITES

To apply to the M2 RMI, candidates must have successfully completed the first year of a European degree (or equivalent). A committee composed of faculty members will evaluate each application. Strong emphasis is put on the motivation for research. Candidates' level of English will be evaluated with an interview.

Initial undergraduate and graduate studies
Continuing education

PHD PROGRAM AFTER THE MASTER

Students who successfully complete their M2 RMI may apply for a three-year PhD program. The first year of the PhD program is dedicated to advanced courses and finalizing the research proposal. From the second year on, students focus on developing their own dissertation. Our students are expected to shape their research agenda through interaction with the Faculty and their advisors and to present their research at academic conferences. They will also acquire teaching expertise in their chosen fields. Competitive funding is available at the University Côte d'Azur.
