

## Memento of the 2021-2027 European Union programs for higher education, research and innovation

Mémento  
des programmes 2021-2027  
de l'Union européenne  
pour l'enseignement supérieur,  
la recherche et l'innovation

Université Côte d'Azur eUniversité Côte d'Azur is among the editors of a new guide for universities. It presents the three main European programs that are at the heart of European policies for higher education, research and innovation institutions: Erasmus+, Horizon Europe and cohesion policy.

The European programs for higher education, research and innovation for the period 2021-2027 offer an unprecedented level of integration and complementarity, placing universities as the main actor in this continuum. Closely linked to each other, they all contribute to the European Commission's 2019-2024 political priorities: a European Green Deal, a Europe fit for the digital age, an economy that works for people, a stronger Europe on the international scene, the promotion of our European way of life, a new impetus for European democracy.

The 2021-2027 multiannual financial framework is part of a new political context. In order to mitigate the effects of the Covid 19 crisis, the Next GenerationEU plan was launched. This temporary recovery plan (2021-2024) at European Union level must feed the recovery by supplementing European programs (such as Horizon Europe, cohesion policy, INVEST-EU) for a greener, digital Europe and resilient. For France, the implementation of the European recovery plan, and the future cohesion policy 2021-2027 represent more than €60 billion to support the French territories in the management of the social crisis, the recovery and the transition towards an economy resilient and durable.

Alongside a new space desired by Commissioner Mariya Gabriel, the European Innovation Area, the legislative frameworks of ERA and EHEA strengthen the interactions between research, innovation and training. In particular, ERA supports the implementation of open science or gender policy, essential for universities and which also require reciprocity at the international level. Pilot European universities – an initiative to which France Universities has contributed – alongside other European initiatives give substance to these European spaces and accelerate their development. They also contribute to bringing together regional, national and European policies, at the very least, to linking these three dimensions. ([Full article](#))

## First edition of the European Innovation Campus

Mariy Gabriel, European Commissioner for Innovation, Research, Culture, Education and Youth was the guest of honor on 14 and 15 September to officially launch the first edition of the European Campus of innovation. The event took place at IMREDD, also in the presence of Jeanick Brisswalter, President of Université Côte d'Azur and Christian Estrosi, Mayor of Nice.

This event co-organized by the European Commission, Université Côte d'Azur, Region Provence-Alpes-Côte d'Azur and Métropole Nice Côte d'Azur brought together the actors who bring innovation to life on our territory and in Europe: authorities local and regional authorities, higher education establishments, students, researchers, investors, associations, incubators, accelerators. Young people were at the center of this event with the "Young European Innovators" competition which rewarded new talents from the Provence-Alpes-Côte d'Azur region, as well as women entrepreneurs and innovators. Two thematic workshops on artificial intelligence and our territories as well as on digital technology for culture and creativity also took place.

The EU Innovation Campus initiative was announced by European Commissioner Mariya Gabriel during the inauguration of the Brussels offices of Regions of France on December 1, 2021. The EU Innovation Campus is a new event concept highlighting the role of regions and local authorities, educational establishments and young people, but also researchers, innovators and investors, to foster the development of innovation in Europe. In particular, the aim is to show what role these different actors play in the innovation process and for its dissemination. This event is intended to become recurring and to be organized in other cities over the years. The next edition will take place in Sofia, Bulgaria, in September 2023.

## MINERVA – Study visit and Workshop on Research and Open Science in Nice St Jean d'Angély

During the Study Visit in Nice, university partners from Armenia and Moldova spent two days sharing best practices in research and Open Science with Université Côte d'Azur.

In a context increasingly marked by digitalization, democratization of research, and accessibility of research results to the greatest number, some universities are not hesitating to invest their means to adapt to the wave of change in this area, and it is particularly through this willingness that 3 Moldovan universities and 4 Armenian universities were present on site, united by this project of the ERASMUS+ program. The speakers from the university, Ms Nathalia Timus, pedagogical manager, and Ms Anne Brogini, vice-president of Open Science at Université Côte d'Azur, highlighted aspects of the future of research in Europe, as well as the difficulties, challenges and good practices in terms of innovation and Open Science.

The seminar ended up with a workshop involving the foreign partners in the joint development of a sustainability strategy for the results achieved in the framework of the Minerva project, and in new initiatives & signature of new collaborations and projects.

## European Researchers' Night in NICE – Throwback time

The European Researchers' Night took place on Friday September 30 in the park of the Valrose campus in Nice. The event was led by the Scientific Culture Unit of Université Côte d'Azur. The MET was present with a space dedicated to European projects and Europe in general. On the agenda : exhibition about the projects that have an impact on our territory, quiz on Europe and European research, games for the youngsters and immersive experiences in the European Parliament. The next Night will take place in September 2023.

## In brief

### WELCOME PARTY at Université Côte d'Azur

Thank you to all the exhibitors for participating in the first edition of the WELCOME PARTY of Université Côte d'Azur, which was a great success! Our students now have all the keys in hand to succeed in their mobility in Nice or to study abroad, with complete peace of mind. Organized by the International Development and Europe Department and with the participation of: *Direction Relations Entreprise, Bureau d'Aide à l'Insertion Professionnelle, Engagement Center, Centre Europe Direct, Maison de l'étudiant Nice, Région Sud - Provence-Alpes-Côte d'Azur, UCArts, Face06, Les Petits Débrouillards, Assurance Maladie*

#mobility #international  
#erasmusplus

## Selection of ongoing calls for projects

- ♦ Montage de Réseaux Scientifiques Européens ou Internationaux (MRSEI) : **18/10**
- ♦ INTERREG EURO-MED A smart and green Mediterranean: **27/10**
- ♦ ANR Generic Call for projects 2023 : **07/11**
- ♦ CHRIST-ERA – Call on open and reusable research data and software : **14/12**
- ♦ INTERREG ALCOTRA Calls for simple projects «New challenges » and « Governance » : **15/12**

- ♦ 12-14 December : **INFODAY** for 2023 calls for projects of Cluster 4 "Digital, Industry and Space"

### PROJECT ASSISTANCE REQUEST FORM

For projects to be carried out by UCA, CNRS and OCA
